1. The project citizenship II – extension period.

The period of extension for one year more has permitted the continuation of the work of the citizenshipgroup of ENOTHE. Three main activities have had major time-investment of the group:

- The booklet with educational materials from an occupational perspective on citizenship
- The ongoing scoping review on citizenship, occupation and occupational therapy. New insights have enlarged our scope and have amplified our review. Especially to search and include in different languages, including the spanish and portugese literature, has been an hugh amount of work. Even handsearch has been done.
- Our group has been honoured to be invited to write an chapter for a book which is mainly the translation of a recently plublished landmark book in Occupational Therapy in Brazil. We have responded to this invitation and with a very tight schedule we have written a chapter for this book, now in press and to be published in 2020.

Other activities as participating in conferences have also been of importance regarding our external communication and dissimination of our work as for the constantly ongoing dialogical evolution of our thoughts in interference with evolutions in occupational therapy, occupational science and our now-a-days societies.
